Mr. Wayne Western  
State of Utah  
Department of Natural Resources  
Division of Oil, Gas and Mining  
P.O. Box 145801  
Salt Lake City, UT 84114-5801

Dear Mr. Western,

Thank you for your recent inspection of our Maynard Topaz project, permit number: S/023/0099. I am following up your inspection letter dated June 22, 2009 with a small clarification.

Our company currently has the Maynard site under lease and intends to begin operations this fall. We have not yet created any disturbance on the property as the project has not yet begun. The previous operator is responsible for the current conditions of the property including both the lack of topsoil stockpile and the deleterious trailer and camper shell.

I had no knowledge of the trailer and camper but can easily remediate this problem after initiation of activities this fall. We will also be saving as much topsoil as possible during site development for future reclamation activities.

I apologize for problems, if any, arising from this misunderstanding. Also, I want you to understand that we will do all that we can to maintain a safe and professionally run operation.

Sincerely yours,

Bryan Lees  
President
